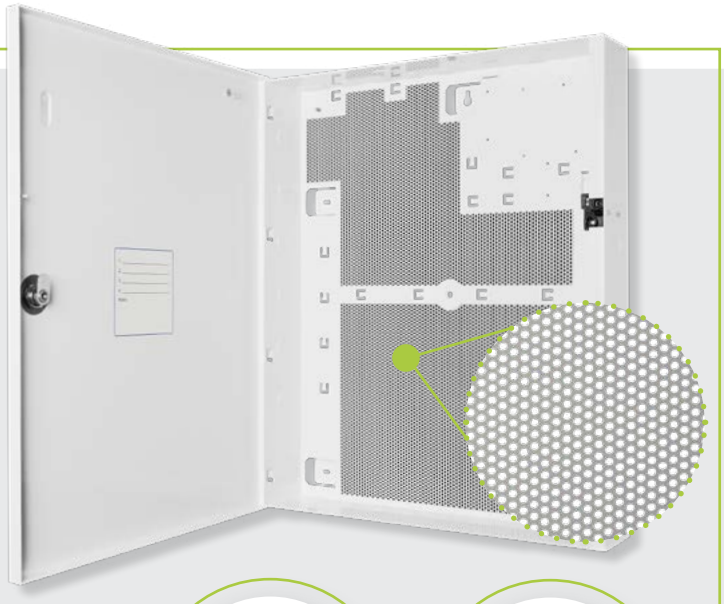
- Powder coated white steel enclosure
- High energy efficient - reducing energy bills
- Mesh backplate assists airflow
- Lifetime warranty



DESCRIPTION

Developed in response to the ever-increasing variety of third-party devices, the Universal Enclosure Range has been designed to simplify PSU enclosure selection and improve installation flexibility.

With its versatile design, this range eliminates the common challenge of matching enclosures to specific control boards, communicators, or modules – offering a truly universal solution.

KEY FEATURES

- **Universal compatibility** - supports a wide range of third-party devices, including control boards, communicators, and modules
- **Built-in tamper switch** for enhanced security
- **No drilling required** - supplied with all necessary fixings for fast, easy installation
- **Available in a range of sizes** to suit various setups
- **Designed to allow effective airflow,** helping to maintain device efficiency and prevent overheating

The Universal Enclosure Range simplifies installation, improves flexibility, and solves compatibility issues – all in one smart solution.
