

MULTI-ACCESS-PSU12

NEW

**Enterprise-Grade Access Control Enclosure
Engineered by Elmdene**

Scalable, Flexible, Secure

Enterprise-Grade Access Control Enclosure

Designed to support large access control systems, the enclosure is ideal for high-security environments such as **data centres, airports, transportation hubs, healthcare and pharmaceutical facilities**. With the capacity to house **up to 24 access control devices**, it ensures seamless integration and centralised management of large-scale security infrastructures.

Complete Installation Flexibility

Allowing simultaneous use of 12V and 24V power sources within a single unit, it eliminates the need for multiple enclosures, reducing complexity and installation costs. The enclosure can accommodate three Power Supply Modules in conjunction with multiple Fused Output Modules, to provide safe distribution of power to the devices and locks.

Designed for High-Security Environments

Built for scalability and efficiency, this enclosure is the ultimate solution for organisations demanding reliable, high-capacity access control infrastructure.

Elmdene's Universal Mesh Design

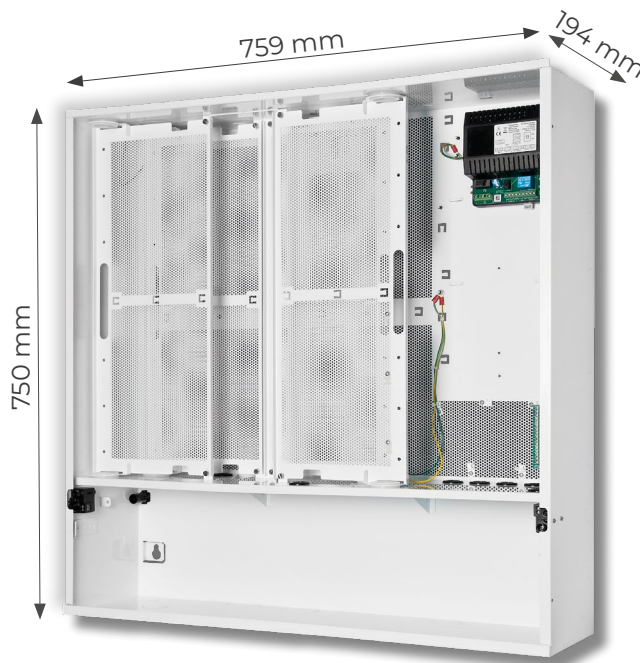

Universal backplates not only provide flexible installation but also enhance airflow and heat dissipation, ensuring optimal performance in mission-critical environments.

FEATURES

- Utilises Elmdene's unique Universal mesh design, providing complete installation flexibility
- Can accommodate up to 12 large or 24 small controllers / modules
- Customisable power configurations – includes one PSU module, with capacity for two additional ones to be fitted
- Front + rear tamperers
- Two lockable points for enhanced security
- Ease of installation:
 - Wall mountable
 - Provided with 4 x hinged Universal panels
 - Fully removable cover
 - Extensive fixing kits supplied, including a range of screws and PCB standoffs
 - Cable management fixings provided
- Separate enclosed compartment for batteries
- Fits 3 x 12V 38Ah or 6 x 12V 17Ah batteries
- Lifetime warranty

ORDERING INFORMATION

PART NO

MULTI-ACCESS-PSU12

DESCRIPTION

Universal XXL Enclosure with 4 hinged plates
 Dimensions H750 x W759 x D194 (mm)
 Max Battery: 3 x 12V 38Ah / 6 x 12V 17Ah
 Including
 1 x Selectable SMPSU - 13.8Vdc 8A / 27.6Vdc 4A
 with an 8-way Fused Output Module
 Capacity to include 2 other PSUs – sold separately

CONTROLLER CAPACITY

12 Large controllers or
 24 Small controllers

COMPATIBLE POWER SUPPLY MODULES (SOLD SEPARATELY)

Part Number	Voltage and Amp Rating	Mains Fail Reporting	Battery Monitoring	PSU Monitoring
G1224-42NU	12V 4A / 24V 2A	●		
G1224-63NU	12V 6A / 24V 3A	●		
G1224-84NU	12V 8A / 24V 4A	●
