

Specialist PSUs

50 Years In the Making

With over 50 years of experience in designing and manufacturing Security and Fire products, Elmdene is a reliable choice for product development and bespoke solutions.

Simple Goals

Our aim is simple:

...to provide customers with high quality and innovative products backed by first class and ongoing support, whenever our customers need it.

Reputation is everything

Elmdene have earned a great reputation from partnerships, bringing comprehensive technical knowledge, manufacturing expertise, high quality, and first-class project management to each unique solution brought to market.

Accreditations

Accredited to BS EN9001 for quality management systems and compliant to ISO 14001 for environmental management, we work to meet the requirements of quality and technical standards around the world!

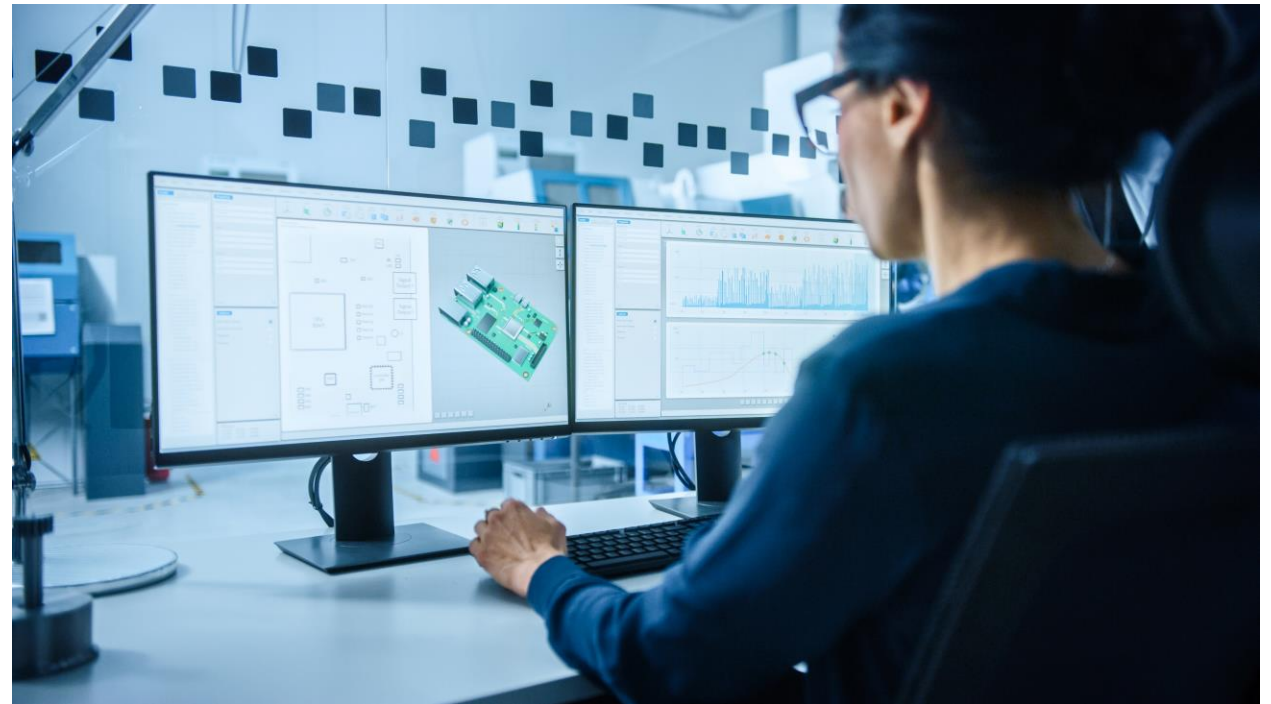

Full Product Development Process

Having a vast experience of product development, Elmdene are choice partners for the development and manufacture of your product. Elmdene look after and manage the full process from generating concepts, 3D prototypes, product testing, sampling, production and technical support.

With an on-site Engineering team and an in-house design team, Elmdene are always on hand to support with your development project needs.

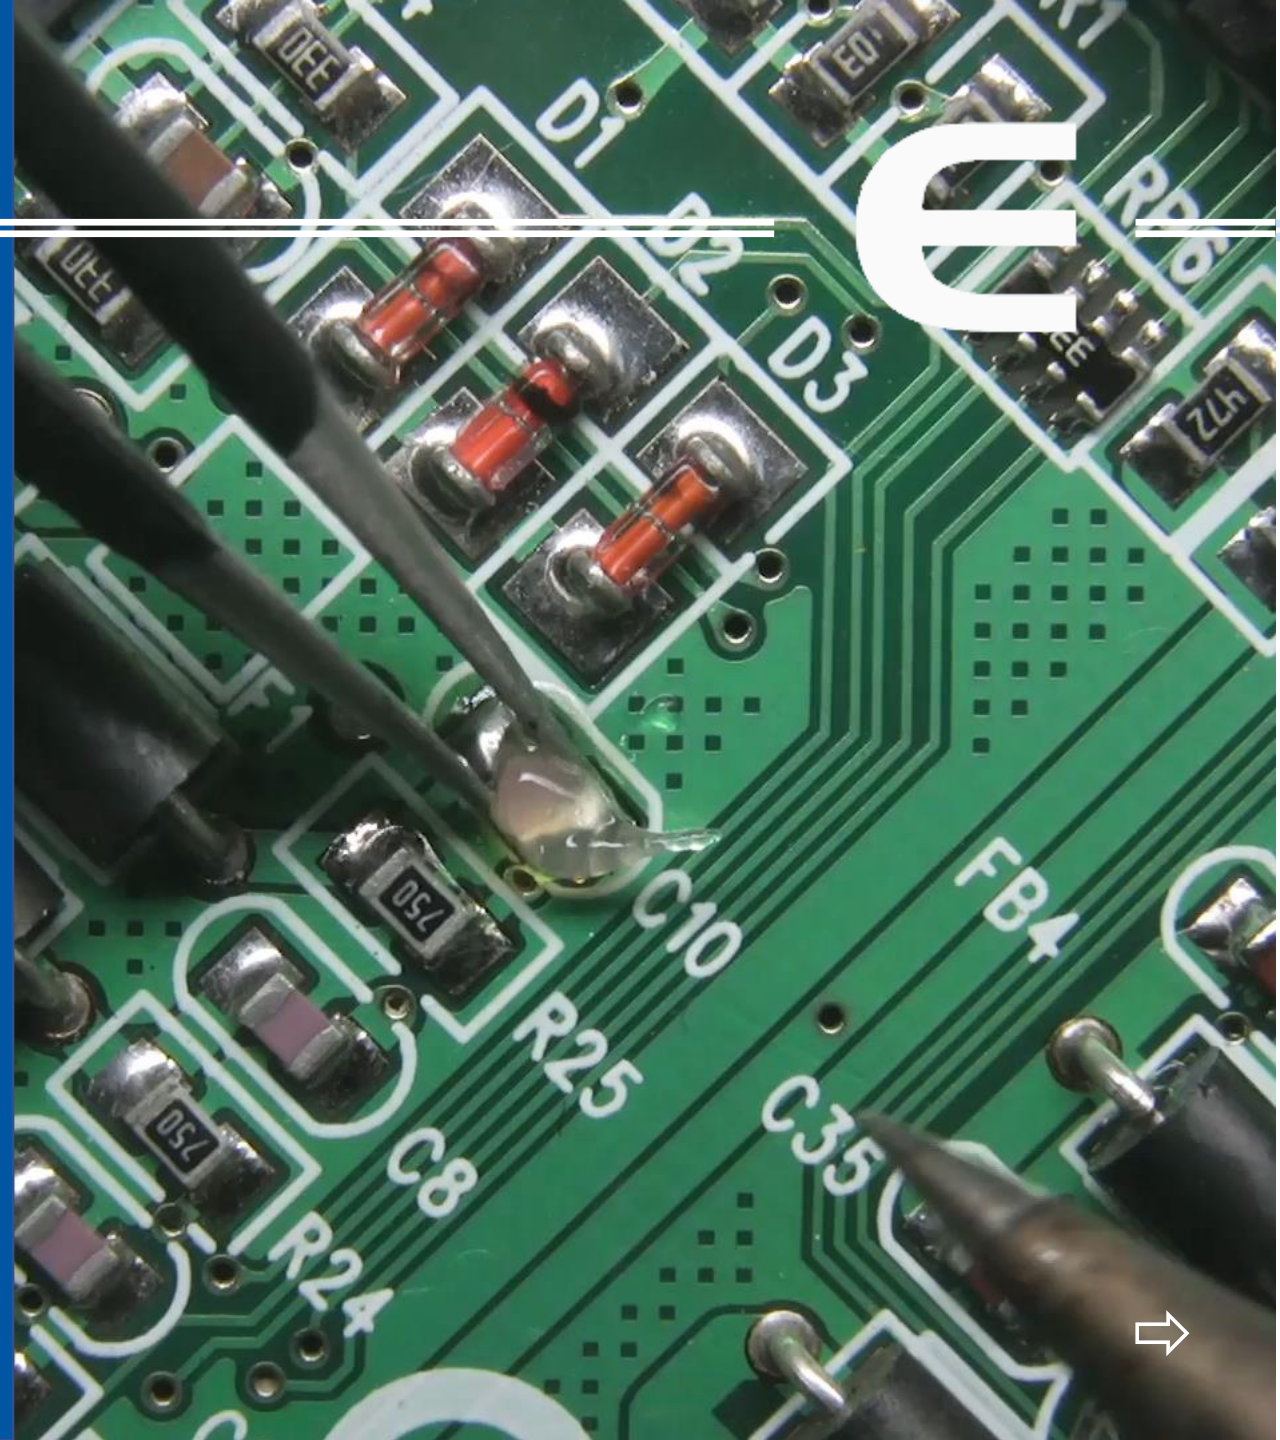

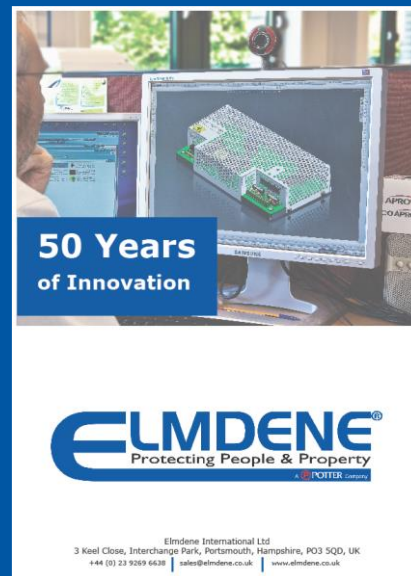

Product Expertise

The following capabilities can be applied to any ancillary product for the Fire and Security market:

- Mechanical Design
- Electronic Design
- Plastic Moulding
- Software Development
- Tooling Expertise

Innovation at
Elmdene

In-house Capabilities

Producing reliable products of a high standard is at the core of everything Elmdene do.

As well as having a Quality Management System accredited to ISO 9001:2015, Elmdene also specialise in manufacturing products to quality and technical standards from across the world, including VdS, Nfa2p, INCERT, UL and Kiwa.

NEW Lithium Backup Battery

IMPROVED PERFORMANCE

LONGER CYCLE LIFE

INCREASED SERVICE LIFE

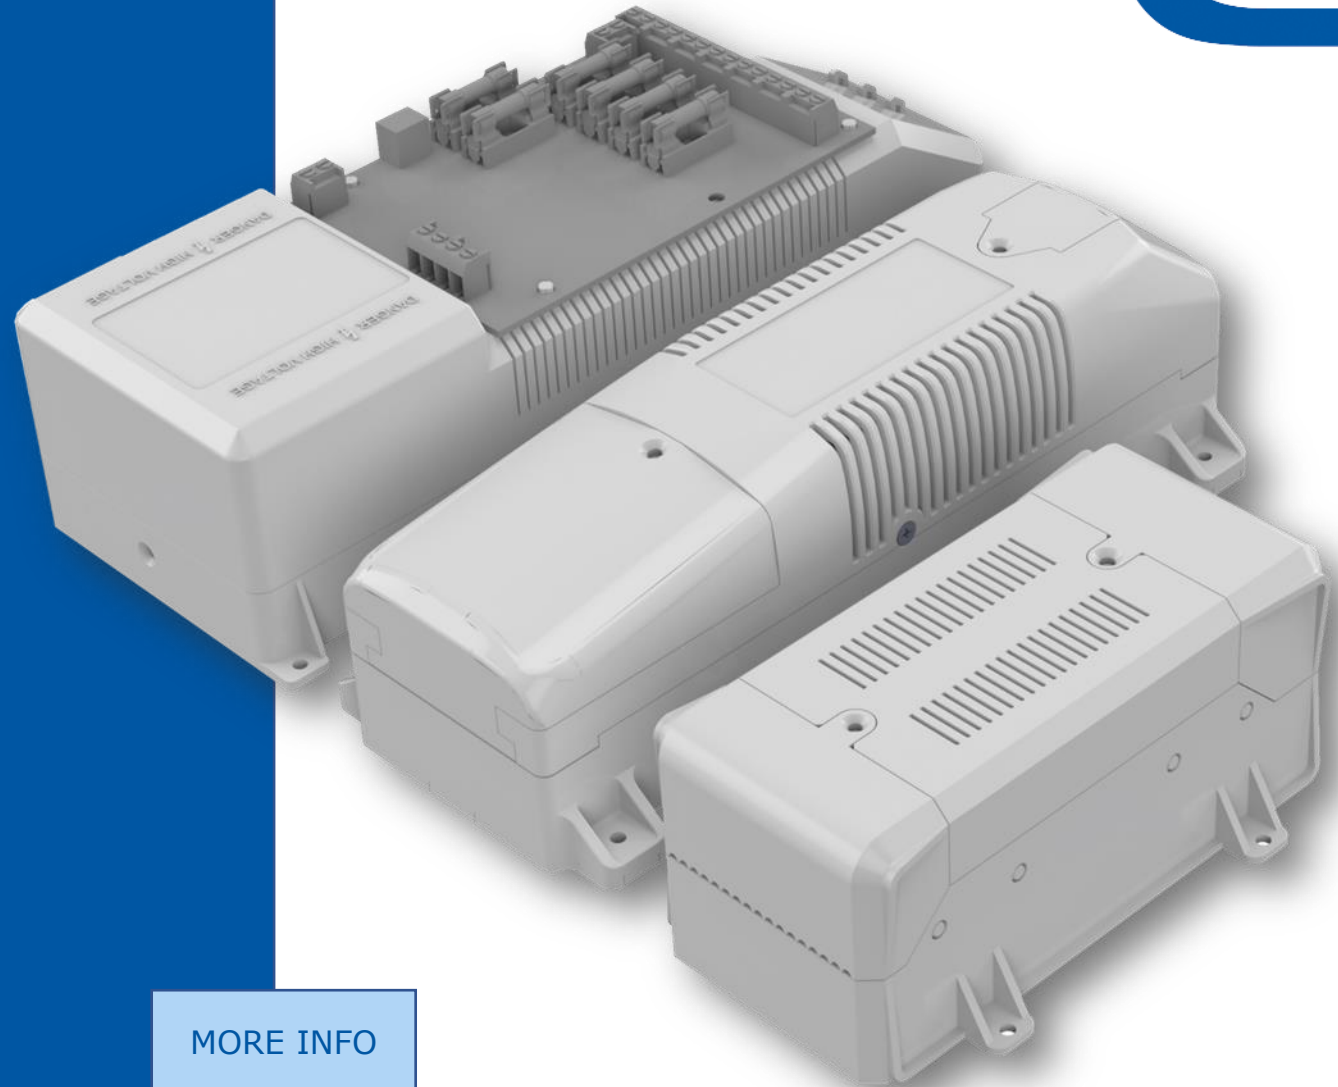

INSTALLATION FLEXIBILITY

LIGHT WEIGHT

REDUCED CHARGE TIME

IMPROVED VOLTAGE PERFORMANCE

LOW SELF-DISCHARGE RATE
