SS2-X (Set Switch with LED)

Overview

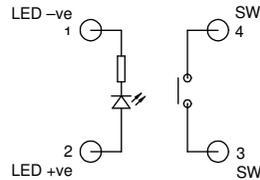

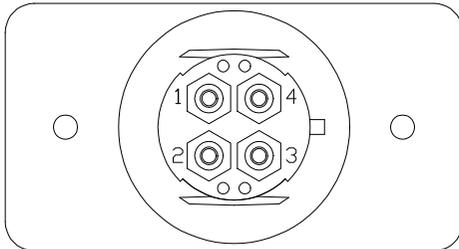

The set switch is designed to provide a means of setting an alarm system from a door bell push. An LED can be used to provide a visual indication of the control panel condition.

Operation

The unit comprises a normally open push button switch and an LED to provide a visual indication rated for 12v DC.

Specification

Length of front bezel	50 mm
Width of front bezel	28 mm
Depth behind bezel	12 mm
Operating Voltage (LED)	12v DC
Switching current	50mA
